The Implicit Relational Assessment Procedure is not suitable for individual use

Supplementary materials

Figure 1S. Highest probability (MAP) IRAP D score 95% Confidence Interval calculated for each domain and trial type

Highest probability (MAP) 95% CI width

Figure 2S. Caterpillar plot of IAT D scores and 95% Confidence Intervals for each domain

**Figure 3S.** Highest probability (MAP) IAT *D* score 95% Confidence Interval calculated for each domain

Figure 4S. Proportion of IAT *D* scores that exclude the zero point within each domain

**Figure 5S.** Proportion of IAT *D* scores that can be discriminated from one another within each domain

Figure 6S. Proportion of the observed range covered by individual participants' IAT *D* scores' 95% Confidence Intervals within each domain.
